**Extinguishing Media advised against:**

**Fire and/or Explosion Hazards:**

**Fire Fighting Methods and Protection:**

**Hazardous Combustion Products:**

Water can absorb heat and keep exposed material from being damaged by fire.

No Data Available

Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back.

Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products.

Carbon Oxides, Carbon dioxide, Carbon monoxide, Toxic fumes., Toxic gases

## VI. ACCIDENTAL RELEASE MEASURES

---

**Personal Precautions and Equipment:**

No health effects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS

**Methods for Clean-up:**

No special spill clean-up considerations. Collect and discard in regular trash.

## VII. HANDLING AND STORAGE

---

**Handling Technical Measures and Precautions:**

Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Wash thoroughly after handling. Do not get in eyes, on skin and clothing. Ground and bond containers when transferring material. Keep in air-tight containers- material is hygroscopic. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous.

**Storage Technical Measures and Conditions:**

Store in a cool dry place. Isolate from incompatible materials. Keep away from sources of ignition. Store in a tightly closed container. Do not store near combustible materials. Store in a cool place in original container and protect from sunlight. Keep container closed when not in use. Keep away from food and drinking water.

**Materials to Avoid/Chemical Incompatibility:**

Strong oxidizing agents Strong bases Strong acids Acetic anhydride Chlorinated compounds Metals Caustics (bases)

## VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

---

**Engineering Measures:**

No exposure limits exist for the constituents of this product. Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort. Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Facilities storing or using this material should be equipped with an eyewash and safety shower.

- Respiratory Protecton:** Respiratory protecton may be required to avoid overexposure when handling this product. General or local exhaust ventlaton is the preferred means of protecton. Use a respirator if general room ventlaton is not available or suficient to eliminate symptoms. Follow a respiratory protecton program that meets 29 CFR 1910.134 and ANSI Z88.2 requirements whenever work place conditons warrant the use of a respirator. Respiratory protecton may be required in additon to ventlaton depending upon conditons of use.
- Eye Protecton:** Wear chemically resistant safety glasses with side shields when handling this product. Do not wear contact lenses. Wear goggles and a Face shield
- Skin Protecton:** Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eatng, drinking, and when leaving work Where contact is likely, wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield
- Gloies:** No informaton available
